DISEASES

OTHER

- INFECTED SURGICAL WOUND 2

MAJOR OPERATION

Diagnosis

Multiple myoma uteri

Operation

Total abdominal hysterectomy with bilateral salpingo-oophorectomy

Pathology result

- **Endometrium: atrophic endometrium**
- **Myometrium: intramural leiomyomata 3-10 cm**
- **Serosa: unremarkable**
- **Uterine cervix: Nabothian cysts**
- **Both ovaries: corpus albicans**
- **Both fallopian tubes: Walthard rests**

MAJOR OPERATION

Diagnosis

Mucinous adenocarcinoma of right ovary stage Ia

Operation

Exploratory laparotomy with total abdominal hysterectomy with bilateral salpingo-oophorectomy with omentectomy with bilateral pelvic lymph node sampling with ascites fluid collection

Pathology result

- **Right ovary: mucinous adenocarcinoma with expansile invasive pattern, size 25x25x20cm., tumor limited to ovary, no lymph-vascular invasion present, no perineural invasion present, no tumor present at ovarian surface, intact ovarian capsule**
- **Right fallopian tube: unremarkable**
- **Right ovary: cystic follicles and corpus albicans**
- **Left fallopian tube: partubal cysts, serous type, Walthard cell rests**
- **Endometrium: proliferative endometrium**
- **Myometrium: intramural and subserous leiomyoma size 1-3 cm**

MAJOR OPERATION

Diagnosis

Mucinous adenocarcinoma of right ovary stage Ia

Operation

Exploratory laparotomy with total abdominal hysterectomy with bilateral salpingo-oophorectomy with omentectomy with bilateral pelvic lymph node sampling with ascites fluid collection

Pathology result

- **Serosa: unremarkable**
- **Cervix: unremarkable**
- **Omentum: unremarkable**
- **Both parametrium: unremarkable**
- **Right pelvic lymph node: no metastasis in 5 lymph nodes**
- **Left pelvic lymph node: no metastasis in 7 lymph nodes**
- **Peritoneal washing: negative for malignancy**

MAJOR OPERATION

Diagnosis

Ruptured right tubal pregnancy

Operation

Exploratory laparotomy with right salpingectomy

Pathology result

- Right fallopian tube: tubal pregnancy

MAJOR OPERATION

Diagnosis

Ruptured corpus luteal cyst of right ovary

Operation

Exploratory laparotomy with right ovarian cystectomy

Pathology result

- Right ovarian cyst: corpus luteum cyst

MAJOR OPERATION

Diagnosis

Right ovarian tumor

Operation

Total abdominal hysterectomy with right salpingo-oophorectomy with omentectomy with peritoneal washing with lysis adhesion

Pathology result

- **Right ovary: request IHC AFP, CK7, CK20, TTF-I, WT-1, p53, size 8x8x7.5 cm., tumor invades right fallopian tube, no tumor present at ovarian surface, intact ovarian capsule, no lymph-vascular invasion present, no perineural invasion present**
- **Right fallopian tube: hydrosalpinx**
- **Endometrium: weakly proliferative endometrium, endometrial polyp 2x0.1x0.1 cm**
- **Myometrium: unremarkable**
- **Cervix: Nabothian cysts**
- **Omentum: unremarkable**
- **Right pelvic lymph node: no metastasis in 6 lymph nodes**
- **Left pelvic lymph node: no metastasis in 3 lymph nodes**
- **Peritoneal washing negative for malignancy**

MAJOR OPERATION

Diagnosis

**Endometrioid adenocarcinoma of endometrium
stage Ia G2**

Operation

**- Total abdominal hysterectomy with bilateral
salpingo-oophorectomy with bilateral pelvic node
dissection with peritoneal washing**

Pathology result

- **Endometrium: endometrioid adenocarcinoma (FIGO grade 2), size 5x5x5 cm., tumor limited to endometrium, no lymph-vascular invasion present, no perineural invasion present, uninvolved exocervical margin (5 cm from tumor), endometrial polyp 0.2 cm, atrophic endometrium**
- **Myometrium: subserous leiomyoma 0.5 cm.**
- **Serosa: unremarkable**
- **Cervix: Nabothian cysts**
- **Both parametrium: endosalpingiosis**
- **Both ovaries: corpus albicans**
- **Right fallopian tube: partubal cysts, serous type**
- **Left fallopian tube: unremarkable**
- **Omentum: unremarkable**
- **Right pelvic lymph node: no metastasis in 3 lymph nodes**
- **Left pelvic lymph node: no metastasis in 9 lymph nodes**

MINOR OPERATION

Operation	Times
Marsupialization	2
Incision and drainage	1
Fraction and curettage	2
Loop electrosurgical excision procedure	4
Curettage	25
Excision	1
Debridement	1
MVA	1
Resuture	0
Drainage	1

LAPAROSCOPIC SURGERY

Operation	Times
Total laparoscopic hysterectomy with Bilateral salpingo-oophorectomy Bilateral salpingectomy	10
Laparoscopically assisted vagina hysterectomy with Bilateral salpingectomy Bilateral salpingo-oophorectomy	4

LAPAROSCOPIC SURGERY

Operation	Times
Laparoscopic salpingo-oophorectomy	4
Vaginal hysterectomy with AP repair	4
